No. 13.—Gross and Net Reproduction Rates and Birth Rates per 1,000 Women.

Item.	Western Australia.		Australia.	
	1947.	1954.	1947.	1954.
Gross Reproduction Rate (*a*)	1·683	1·772	1·493	1·558
Net Reproduction Rate (*b*)	1·595	1·683	1·416	1·478
Birth rate per 1,000 women (age 15 and over)	72·45	74·40	63·98	63·47
Birth rate per 1,000 women (ages 15 to 44 inclusive)	115·99	121·35	106·47	107·52
Ex-nuptial birth rate per 1,000 women (age 15 and over)	2·67	3·33	2·55	2·52
Ex-nuptial birth rate per 1,000 women (ages 15 to 44 inclusive)	4·28	5·42	4·24	4·27

(*a*) The gross reproduction rate is the estimated average number of female children born to every woman who lives through child-bearing age.

(*b*) The net reproduction rate allows for the effects of mortality and is an index of the number of women who in the next generation, will replace the women of reproductive age in this generation.

No. 17.—Causes of Death, 1955.

Statistics of causes of death in Australia from 1950 are based on the Detailed List of the 1948 Revision of the International Lists of Diseases and Causes of Death. Certain categories have been grouped to facilitate publication, but in all cases the detail required for the Intermediate List of 150 Causes has been preserved, in accordance with World Health Organization Regulations. In general three-digit categories are used, but some four-digit sub-categories have been included to meet Australian requirements.

No. 9.—Expenditure from Consolidated Revenue Fund Classified According to Function, 1954-55 and 1955-56.

(Revised Classification.)

The general purport of this table is to show, in respect to Consolidated Revenue only, the gross cost of each function of Government irrespective of the Department or Departments administering such functions. In cases where an activity could be classified to more than one function it has been shown under the heading which is deemed to be the major function, e.g., the education of natives is shown under "Education" and hospitals for natives have been shown under "Public Health," only the balance of "Care of Aborigines" being shown under "Welfare".

Certain functions are performed by Semi-Government Authorities and do not affect the Revenue Fund with the exception of Public Debt operations and various subsidies and recoups, *e.g.*, Electricity, Banking, Insurance, Roads. In other cases the Revenue Fund recoups certain losses or receives surplus profits, *e.g.*, Trading Concerns, Fremantle Harbour Trust. (These examples do not necessarily exhaust the two categories.) Public Debt Charges are shown as a separate function.

(*a*) Amount payable by the Commonwealth Government under the States Grants (Tax Reimbursement) Acts.

(*b*) Received by State Treasury and paid to Consolidated Revenue.

(*c*) In 1947–48 and in 1949–50 amounts of £1,000,000 and £661,677 respectively were received as Supplementary Grants (*see* table No 7, page 7), but are not shown here as they were not treated as Tax Reimbursement by the State Treasury.

(*d*) Prior to December, 1942, Refunds of Arrears of Tax collected were made by State Treasury, since then the Refunds have been made by the Taxation Department, the State Treasury paying the Gross Collections of Arrears to Consolidated Revenue Fund.

No. 13.—Summary of Commonwealth Government Taxation Collections in Western Australia, 1948–49 to 1955–56.

Note.—The figures in this table represent the amounts collected in Western Australia but do not necessarily indicate the amount contributed by the people of the State, as moneys are collected in one State in respect of goods consumed in, or assessments made on account of, other States.

EXTERNAL TRADE OF WESTERN AUSTRALIA.

Year ended 30th June, 1956

In the following summary all values are expressed in Australian Currency and figures in parenthesis relate to the previous year.

1.—SUMMARY

With imports totalling £135·5 million, exports £115·7 million and an unfavourable balance of £19·8 million, external trade for the year ended 30th June, 1956, showed a marked improvement on the previous year, when the unfavourable balance amounted to £45·6 million.

Imports decreased by £6·2 million, while exports were greater by £19·6 million.

Shipments to oversea countries exceeded oversea purchases by £34·6 million, but in trade with the other States of the Commonwealth, imports exceeded exports by £54·3 million.

Details of the trade balances for the last years are as follows :—

	1954/55 £	1955/56 £
Oversea Trade—		
Imports	50,647,713	46,481,702
Exports	72,039,222	81,035,350

Exports	24,054,872	34,636,448
Excess of Imports	66,999,956	54,339,515
Total Trade—		
Imports	141,702,541	135,457,665
Exports	96,094,094	115,671,798
Excess of Imports	45,608,447	19,785,867

2.—IMPORTS

Imports totalling £135·5 million were £6·2 million less than in 1954/55, shipments from oversea countries decreasing by £4·2 million and from the other States of the Commonwealth by £2·0 million.

Purchases from oversea countries of metals and metal manufactures were less by £4·0 million and machines and machinery by £2·1 million. Imports of refined fuel and lubricating oils decreased by £1·9 million, but were offset by an increase in the import of crude oil by £7·7 million.

Interstate imports of refined petroleum spirit from the Eastern States, which in 1954/55 totalled £2·6 million, were negligible in 1955/56, while fuel and lubricating oils from this source decreased from £1·3 million to £0·5 million.

The principal countries from which goods were supplied were :—United Kingdom, £17,608,993 (£23,303,186) ; other British Commonwealth Countries, £5,257,037 (£7,406,648) ; and the sources of our crude oil imports, Iran and Kuwait, £13,599,332 (£5,046,875).

Other foreign countries supplying goods were :—United States of America, £2,399,454 (£5,367,074) ; Republic of Indonesia, £1,392,823 (£1,788,128) ; Bahrein Islands, £1,024,273 (£1,215,021) ; Federal Republic of Germany, £871,555 (£808,672) ; Japan, £582,113 (£690,982) ; Belgium,-Luxemburg, £466,440 (£891,777), and other countries, £3,279,682 (£4,129,350).

The other Australian States exporting to Western Australia were :—Victoria, £38,975,662 (£41,657,951) ; New South Wales, £34,458,032 (£32,831,271) ; South Australia, £10,831,280 (£12,488,137) ; Queensland, £2,844,041 (£2,761,903) ; Tasmania, £1,528,992 (£1,002,743), and Northern Territory, £337,956 (£312,823).

Principal imports from all sources were :—Crude Oil, £13,197,840 (£5,465,958) ; Motor Vehicles and Parts, £12,310,887 (£14,475,300) ; Apparel, £10,235,256 (£10,741,129) ; Iron and Steel, £7,879,653 (£7,607,929) ; Textiles, £6,597,073 (£6,983,000) ; Tyres and Tubes, £3,113,585 (£2,931,478), and Tobacco, Cigarettes and Cigars, £2,676,656 (£3,026,216).

3.—EXPORTS

Exports totalled £115·7 million and were £19·6 million greater than the previous year.

Shipments of refined petroleum products which increased by £11·7 million to the Eastern States and by £2·0 million to oversea countries represented 14·4 per cent. of total exports.

Exports of wool, together with tops, noils and wastes, amounted to £36·8 million, accounting for 31·8 per cent. of all exports.

Shipments of wheat valued at £14·4 million were higher, as were those of flour, which amounted to £3·9 million.

Of the oversea countries purchasing from Western Australia, the United Kingdom received £28,007,183 (£26,223,301) and other British Commonwealth Countries, £11,472,047 (£14,154,294).

The Federal Republic of Germany received £6,887,537 (£3,441,811); France, £5,561,659 (£5,367,920); the United States of America, £5,136,191 (£5,608,721); Italy, £2,540,716 (£2,310,437); Poland, £2,502,402 (£844,896); Belgium-Luxemburg, £2,020,666 (£2,125,369), and Japan, £1,769,232 (£1,848,843).

Exports to other Australian States were as follows:—New South Wales, £14,030,414 (£13,263,964); South Australia, £9,174,227 (£3,847,518); Victoria, £8,624,887 (£4,852,094); Northern Territory, £1,185,135 (£1,014,413); Queensland, £994,715 (£510,823), and Tasmania, £223,930 (£166,122).

Details of the principal exports are given hereunder:—

Greasy Wool.

Although the quantity exported exceeded that of the previous year, the return was lower, 113,289,040 lb. of wool realised £28,947,217, being an average of 61·324 pence per lb., compared with 96,554,322 lb. for a value of £29,648,228, an average of 73·695 pence per lb., during 1954/55.

The United Kingdom received 47,726,219 lb. (44,449,533 lb.) for £12,145,386 (£13,684,395); France, 18,142,938 lb. (14,201,786 lb.) for £4,390,357 (£4,104,370); Belgium-Luxemburg, 7,384,065 lb. (5,744,051 lb.) for £1,669,748 (£1,738,994); Italy, 7,231,629 lb. (6,284,462 lb.) for £1,772,946 (£1,794,635); Federal Republic of Germany, 6,169,700 lb. (4,596,565 lb.) for £1,572,383 (£1,395,306).

Scoured Wool.

Exports of Scoured Wool totalled 16,744,513 lb. (13,261,323 lb.) valued at £6,209,713 (£5,633,302) or an average of 89·00 pence (101·95 pence) per lb.

Shipments to the United Kingdom accounted for 5,182,015 lb. (4,821,982 lb.) for a value of £1,781,595 (£1,905,210); Federal Republic of Germany, 2,415,939 lb. (1,461,775 lb.) for £898,430 (£609,070); United States of America, 2,063,533 lb. (1,461,032 lb.) for £787,843 (£612,835); China, 1,797,294 lb. (1,392,207 lb.) for £794,270 (£738,098), and Canada, 803,368 lb. (464,762 lb.) for £289,675 (£185,572).

Wheat.

Shipments of wheat totalled 22,773,235 bushels (19,334,742 bushels) for a value of £14,429,864 (£13,738,962), the average price per bushel being 12s. 8·07d. (14s. 2·54d.).

United Kingdom purchases totalled 12,183,920 bushels (7,909,851 bushels) valued at £7,577,374 (£5,577,923); Federal Republic of Germany, 3,881,995 bushels (922,693 bushels) at £2,467,715 (£680,359); Republic of India, 2,053,595 bushels (8,932,075 bushels) at £1,271,235 (£6,363,423), and Syria, 1,685,525 bushels (355,077 bushels) at £1,229,974 (£242,150).

Petroleum and Petroleum Products.

Exports of petroleum spirit totalled 119,543,317 gallons and realised £7,687,724, compared with 14,395,223 gallons for £925,417 during 1954/55.

Interstate shipments comprised 107,662,403 gallons (8,740,071 gallons) for a value of £6,958,086 (£570,608).

Oversea shipments were made principally to New Zealand, which received 11,681,458 gallons (5,485,327 gallons) for a value of £717,015 (£338,971).

Kerosene exports increased to 20,040,908 gallons (1,845,662 gallons) for £1,152,393 (£110,062); Interstate consignments totalled 13,859,787 gallons (1,836,422 gallons) for £807,275 (£108,655), with the Republic of India taking the bulk of the oversea shipments.

Exports of diesel, fuel and furnace oils amounted to 192,449,147 gallons (48,333,532 gallons) valued at £7,836,054 (£1,966,348). Eastern States purchases accounted for 151,990,800 gallons (31,902,139 gallons) valued at £5,842,967 (£1,252,233); New Zealand received 14,022,042 gallons (6,729,903 gallons) for £658,034 (£281,355); Aden and Dependencies, 12,043,420 gallons (3,084,800 gallons) for £616,454 (£165,710); Ceylon, 5,980,909 gallons (3,569,932 gallons) for £315,193 (£131,901); Burma, 2,668,780 gallons (Nil) for £103,285, and Arabian States, 1,276,497 gallons (Nil) for £67,505.

In addition to the ordinary exports mentioned above, a considerable quantity of oil is exported as ships' stores in the bunkering of overseas and interstate vessels. In 1955/56 the figures were 89,626,923 gallons valued at £4,159,639 compared with 75,961,096 gallons valued at £3,138,874 in 1954/55.

PART IV.—TRADE, TRANSPORT AND COMMUNICATION.

I.—TRADE AND CUSTOMS.

Prior to the 15th November, 1947, Oversea Imports were valued in British currency and represented the F.O.B. value at Port of Shipment plus the statutory 10 per cent. imposed for value for duty purposes, in accordance with the Customs Act. From the 15th November, 1947, following an amendment to the Act, Oversea Imports have been valued in Australian currency F.O.B. Port of Shipment. In this Register all Oversea Imports are valued on the revised basis (values for the periods prior to 15th November, 1947, being re-computed) and, as Interstate Imports and all Exports have always been recorded in Australian currency, the values throughout are now expressed in uniform terms.

No. 1.—Value of Imports into and Exports from the State of Western Australia during the Years ended 30th June, 1955 and 1956, showing Origin of Imports and Destination of Exports.

No. 5.—IMPORTS during the year ended 30th June, 1956.

Details hereunder are a combination of Interstate Trade Statistics compiled by the State Government Statistician's Office and Oversea Trade Statistics compiled by the Commonwealth Statistician's Office, from documents supplied by importers and their agents.

Note A.—Prior to the 15th November, 1947, Oversea Imports were valued in British currency, and represented the F.O.B. value at port of shipment plus the statutory 10 per cent. imposed for value for duty purposes, in accordance with the Customs Act. From the 15th November, 1947, following an amendment to the Act, the 10 per cent. addition has been eliminated and Oversea Imports have been valued in Australian currency F.O.B. port of shipment. On all Interstate Imports 10 per cent, has been added to the F.O.B. value at the port of shipment.

Note B.—The "quantity" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognized size, and consequently do not indicate the number, capacity, or weight of articles imported.

Note C.—The abbreviation N.E.I. is used throughout this table and means "Not elsewhere included."

Note D.—The following record of Imports has been compiled according to a Statistical Classification divided into 21 Classes, which came into operation on the 1st July, 1945. A list of the classes which comprise the Statistical Classification and an extensive Alphabetical Index of Imports and Exports are given on pages immediately prior to this page.

No. 6.—EXPORTS from the State during the Year ended 30th June, 1956.

Details hereunder are a combination of Interstate Trade Statistics compiled by the State Government Statistician's Office and Oversea Trade Statistics compiled by the Commonwealth Statistician's Office, from documents supplied by exporters and their agents.

Note A.—The value of goods exported is recorded in Australian currency. The basis of valuation is F.O.B., or its equivalent, at port of shipment.

Note B.—The "Quantity" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognised size and consequently do not indicate the number, capacity or weight of articles exported.

Note C.—The abbreviation N.E.I. is used throughout this table and means "Not elsewhere included."

Note D.—The following record of Exports has been compiled according to a Statistical Classification divided into 21 classes which came into operation on 1st July, 1945. A list of the classes which comprise the Statistical Classification and an extensive Alphabetical Index of Import and Exports are given on pages immediately prior to Table No. 5 (Imports).

STATISTICAL DIVISIONS.

NOTES.—1. *This table shows the Municipalities and Road Districts comprising the Statistical Divisions of the State at the 1st January, 1956.*

2. *Since 1928–29 the names and boundaries of Road Districts have been adopted as Statistical Districts. Previously district boundaries were defined from the Sheet Lines of the Standard Plans of the Lands Department.*

3. *For the purpose of statistics of agriculture and livestock, shown in this Part, each Municipality is combined with the surrounding Road District, except in the case of Bunbury Municipality, which alone comprises the Bunbury Statistical District.*

4. *A map showing the boundaries of Statistical Districts and Divisions is published facing page 6.*

VIII.—VALUE OF PRODUCTION.

NET VALUE—

The Annual Net Value of Production represents the sum available each year for distribution among those concerned in industry, i.e., workers, proprietors (including landlords), and providers of capital.

In combining industries this is the value that is used in order to avoid the inevitable duplication that would result if "Gross" or "Local" values were aggregated.

I. PRIMARY PRODUCTION.

(*a*) *Gross Value* is the value placed on recorded production at the wholesale price realised "at the principal market." In cases where primary products are consumed at the place of production or where they become raw material for a secondary industry, these points of consumption are taken as the "principal market."

(*b*) *Marketing Costs*, comprise Freight, Cost of Containers, Commission, and other handling charges.

(*c*) *Local Value* is the value recorded at the place of production, and is obtained by deducting "Marketing Costs" from "Gross Value."

(*d*) *The Value of Goods Consumed in the Process of Production* covers seed and fertilizers used, pickling, sprays, dips, fodder consumed, fuel and oil, and similar costs.

(*e*) *Net Value* represents the return to the producer (farmer, pastoralist, mine owner, etc.) and is obtained by deducting from "Local Value" the "Value of goods consumed in the process of production." Such return is the sum available for payment of wages, interest, rent, depreciation, other overhead costs, and for the producer's own income.

II. MANUFACTURING.

(*a*) *Value of Output* is the selling value "at the factory door" (*i.e.*, the value at the point of sale *less* all selling and distribution costs) of all goods made or processed during the year and includes the amount received for other work done, such as repair work, assembling and making-up for customers. Any bounty or subsidy received on finished products is included.

(*b*) *The Value of Goods Consumed in the Process of Production* covers materials used, fuel, power and light, lubricating oil and water, repairs to plant and buildings, tools replaced and containers and packings.

(*c*) *Net Value of Production* is the value added in course of manufacture. It is derived from the value of output by deducting the value of goods consumed in the process of production and represents the sum available for payment of wages, rent, depreciation, other sundry expenses and for interest and profit.

III. GENERAL.

To secure a proper appreciation of the value of production as set out in the following tables it is well to keep in mind the following considerations :—The sum of the gross values of the several agents of production contains substantial duplications. The total value realised for a season's wheat, for instance, includes cost of transport, commission, and other handling charges, which items form the incomes of those performing these services. Similarly, the Local Value includes value of fertiliser, etc., used, which item will have been included in the value of manufactured production. Again, fodder grown and valued as an agricultural product would also, if fed to milch cows, be duplicated in the value of dairy production. When, however, *net* values are being ascertained, the value of such fodder consumed is deducted as a cost against dairying, thus eliminating duplication. Thus, while Gross Value represents an accurate estimate of the value of the production of any particular industry, *only Net Values should be aggregated in arriving at a total value of "All Recorded Production."*

Part VI.—FACTORY STATISTICS.

EXPLANATORY NOTES AND DEFINITIONS.

Definition of Factory.—For statistical purposes a factory is defined as any establishment which is engaged in the processes of manufacturing, assembling, treating or repairing and in which four or more persons are employed during any period of the year or power (other than manual) is used.

Classification.—In the case of a factory which engages in more than one industry on the same site, a separate return is obtained, where possible, for each industry. Each of these components is then classified as if it were a separate factory. However, where it is not practicable for the manufacturer to submit separate returns, the factory is classified to the predominant activity, *e.g.*, a factory *principally* engaged in manufacturing Ice but also producing Aerated Waters and Cordials would be classified to Ice and Refrigeration.

Confidential Provisions of the Statistics Act, 1907-1956.—In some tables it has been necessary to combine details in order to comply with the provisions of the Statistics Act, which requires that information supplied on any individual return must be treated as confidential, unless permission for its publication is granted by the informant.

Employment.—Figures relate to the factory proper and exclude persons engaged in obtaining raw materials (*e.g.*, persons employed by Sawmills in felling and hauling logs) or persons engaged in selling or distribution. Working Proprietors are included unless otherwise stated.

Average employment figures may be expressed as an average " over the period worked " or as an average " over the whole year." Thus a factory which operates for six months of the year only and employs 20 persons throughout that period has an average employment of 20 " over the period worked," but an average of only 10 " over the whole year." The type of average is indicated in each table.

Value of Output.—The value of output is the selling value " at the factory " (*i.e.*, the value at the point of sale *less* all selling and distribution costs) of all goods made or processed during the year and includes the amount received for other work done, such as repair work, assembling and making-up for customers. Any bounty or subsidy received on finished products is included.

Net Production.—" Net Production " is the value added in the course of manufacture. It is derived from the value of output by deducting the value of goods consumed in the process of production. The values deducted are those of materials used, fuel, power and light, lubricating oil and water, repairs to plant and buildings, tools replaced and containers and packings. " Net Production " represents the sum available for payment of wages, rent, depreciation, other sundry expenses and for interest and profit.

Statistical Divisions.—A map showing Statistical Divisions, and their component Statistical Districts (Local Government Areas), appears in Part V. of the Statistical Register of Western Australia.

(*a*) It should be noted that there is a break in the continuity of the index-number series between June and July, 1935, owing to the inclusion, from July, 1935, onwards, of certain factories previously not included. This tends to exaggerate the degree of recovery.

PART XII.—RETAIL PRICES, WAGES, EMPLOYMENT, AND MISCELLANEOUS.

I.—RETAIL PRICES

This section gives details of Retail Prices, Consumption of Foodstuffs, etc., and Retail Price Index Numbers.

RETAIL PRICES.

Retail Prices of selected groups of commodities and services are collected regularly by the Government Statistician from representative informants in the more important towns of Western Australia.

From 6 towns, prices are obtained for regimens covering (*a*) 41 items of Food and Groceries. (*b*) Rents of 4 and 5-roomed Houses, (*c*) 80 items of Adult and Juvenile Clothing, and (*d*) 27 items of Household Drapery and Utensils, and in addition, other items of Miscellaneous Expenditure, such as Fuel and Light. Prices of Food and Groceries only are collected from a more extensive list of towns. Informants are required to furnish prices monthly (prices as at the middle of the month) for Food and Groceries and quarterly (particulars as at the 15th of the middle month of each quarter) for House Rents, Clothing, and Miscellaneous items.

Specific grades and qualities have been established for the various items included in the regimen in order to ensure that all informants throughout the State shall quote consistently for articles of the same standard. The collection of data in the Metropolitan Area, Kalgoorlie-Boulder, Northam, Bunbury, and Geraldton—the "five towns" of Western Australia in the several Commonwealth retail price index series—is made under the authority of the Commonwealth Census and Statistics Act, 1905–1949. The State Statistical Department directly supervises the collection of data for the Commonwealth Statistician. The actual collection of returns is carried out by specially qualified field officers of the Commonwealth Bureau of Census and Statistics, who are attached to the State Department. These officers check prices and standards in the shops of informants, and inspect houses listed on the rent returns.

In those towns where returns are required under the State Statistics Act, 1907, the method of collection is substantially the same as that outlined above.

During the war years 1939–45 unusual difficulty was experienced in obtaining prices for the compilation of several of the abovementioned series, due mainly to the scarcity and sporadic supply of certain types of goods and to changes in the grade and quality of such. Difficulties were most pronounced in the case of the clothing section and the household drapery and utensils section of the miscellaneous series, necessitating in some cases the substitution of new grades, qualities or types of articles for those formerly included in the regimen, or again the adoption of various statistical devices to overcome the effects of the absence of quotations for goods temporarily off the market or in short supply.

In some measure the problem remained under early post-war conditions, as some goods were still in short supply and stocks were extremely variable. It should be noted, however, that all practicable steps are taken to preserve the statistical integrity of the index.

Food and Groceries.

The regimen of Food and Groceries commodities adopted for the several index series issued by the Australian Statisticians is set out in Table No. 1. This shows the average prices quoted by retailers in the Metropolitan Area during each month of 1956.

CONSUMPTION OF FOODSTUFFS, ETC.

No. 2.—Estimated Annual Consumption of Foodstuffs, Beverages and Tobacco.

Details of the estimated annual consumption of some of the more important food commodities consumed in Western Australia are shown in this table. Particulars of the consumption of spirituous and alcoholic liquors and tobacco preparations are also given.

The figures have been derived from records of production, imports and exports, for the years 1951–52 to 1955–56, and show the average amounts consumed annually per head of population during that period. They include quantities used in manufacturing, such as flour in biscuits, bread, etc.; sugar in jam, and so on.

Where the necessary data were available, adjustment has been made for movement in stocks and for exports as ships' stores.

RETAIL PRICE INDEX NUMBERS.

In this section are shown Index numbers computed from retail prices returns furnished by informants in the more important towns of the State.

These Index numbers cover selected "regimens" (or lists of commodities or services) comprising items of—

I.—Food and Groceries,

II.—Housing (Rents of 4 and 5-roomed Houses),

III.—Clothing, and

IV.—Miscellaneous Household Expenditure,

all of which are combined in the regimen used for the "C" Series Index.

The Price Index series simply measure variations in the aggregate cost of a given regimen of commodities at various intervals of time or as between different towns, and are intended for use as approximate measures of general retail price movements in the commodity classes to which they refer. In this connection it cannot be too strongly emphasised that they do not, and are not, intended to measure an absolute "cost of living," *vide* Commonwealth Statistician's Labour Report No. 21, Appendix "Wages and Prices," page 167.

In the series set out in the following pages the Index numbers themselves represent the several "aggregates" expressed as relatives of the weighted average "aggregate cost" of the same regimen in the six capital cities over some specific interval of time, *e.g.*, the five years 1923 to 1927.

To ensure that the series shall be as reliable as possible, the commodities comprising the complete regimen have been selected to conform to the following conditions:—

1. They must be such that they can be clearly and definitely described.
2. They must be capable of standardisation, and mean the same thing at different times and places.
3. They must not be subject to violent or extreme seasonal fluctuations (hence, in general, fresh fruit and vegetables are excluded from the regimen).
4. They must be in common use, and their usage must comprise an appreciable proportion of the total consumption of the commodity group to which they relate, and moreover, remain relatively constant.
5. On the whole, they must be a fair sample of the commodity group which they purport to represent.

No. 3.—Food and Groceries—Five Principal Towns.

This table sets out Index numbers representing variations in the prices of Food and Groceries in each of the five Western Australian towns covered by the Commonwealth Statistician's inquiries. The table also gives weighted averages for the " five towns," and the six capital cities of the Commonwealth. Weighting is on a population basis.

RETAIL PRICE INDEX NUMBERS—*continued.*

No. 7.—Clothing—Five Principal Towns.

Variations in the prices of the clothing regimen are given in the table hereunder. The regimen is based on the requirements of a nominal family unit of five persons, comprising a man, woman, boy (aged 10½ years), girl (aged 7 years), and boy (aged 3½ years). These persons are taken as representative respectively of men over seventeen years, women over seventeen years, children ten to sixteen years, children five to nine years, and children under five years.

Within each section, the items are weighted according to their relative consumption by the type of person concerned, and the sectional aggregates themselves are brought together in one composite aggregate after they have been weighted in accordance with an appropriate population factor. This factor represents the proportion which each age group bears to the total population.

No. 9.—Food and Groceries, Housing, Clothing and Miscellaneous ("C" Series)—Five Principal Towns.

This table combines together in one series, the index numbers of Food and Groceries, Housing, Clothing and Miscellaneous Expenditure appearing in the preceding pages. This is the Commonwealth Statistician's "C" Series index of Retail Prices. The "C" Series index numbers were adopted by the Commonwealth Court of Arbitration as the basis for the adjustment of the wages declared in its judgment of the 17th April, 1934. From the 1937 Basic Wage judgment, until the 12th September, 1953, the Commonwealth tribunal used special "Court Series" based on the "C" Series.

RETAIL PRICE INDEX NUMBERS—*continued.*

Five Principal Towns, Six Capital Cities and Collie—Each Series.

Tables Nos. 11 to 15 compare movements among the several Index series in each of the Commonwealth Statistician's "five Western Australian towns," while Tables Nos. 16, 17 and 18 give similar details in respect of the weighted average of these towns, the six capital cities and Collie.

Note.—Each series has been given its own base. This is the weighted average cost of the particular regimen concerned, for the six capital cities, during the period 1923–27. The Index numbers cannot, of course, be compared with each other horizontally in order to show the relative costs of the different regimens, since the base of each series has been made equal to 1000.

II.—WAGES.

THE BASIC WAGE.

The concept of a " basic " or " living " wage occurs commonly in the determinations of wage fixing authorities in Australia, although it may vary in definition. Originally the term was understood to mean the minimum or " basic " wage necessary to provide a reasonable standard of comfort for the average worker and his family. In later years, however, economic factors have been taken into account and, in determining specified minimum rates of wage, consideration has been given to the capacity of industry to pay those rates.

There are two tribunals, the Commonwealth Conciliation and Arbitration Commission and the State Court of Arbitration, which have authority to declare basic wage rates applicable in Western Australia.

By an amendment of 1949 to the Commonwealth Conciliation and Arbitration Act, the basic wage for an adult male worker is defined as " that wage, or that part of a wage, which is just and reasonable for an adult male, without regard to any circumstance pertaining to the work upon which, or the industry in which, he is employed." The Act contains a similar definition of a basic wage for females. Before the inclusion of this amendment, the Act empowered the Court to prescribe a " minimum rate of wage " but it neither defined, nor provided for the determination of, a specific " basic wage." In general terms, however, the basic wage was understood to be identifiable as the minimum wage, including " loadings," payable to an adult unskilled labourer. A " loading " may be defined as an addition to the " basic " wage as compensation for some peculiar condition of labour or environment or other circumstance, and not by way of " margin for skill."

The State Industrial Arbitration Act defines the basic wage as " a wage which the Court considers to be just and reasonable for the average worker to whom it applies." The Court must have regard for the needs of the worker to enable him to live in reasonable comfort. An amendment of 1950 requires that the Court shall take into consideration the economic capacity of industry but, in so doing, shall not reduce the basic wage below an amount which it deems necessary to maintain this reasonable standard of comfort.

The Commonwealth Conciliation and Arbitration Commission was established in 1956 by an amendment to the Conciliation and Arbitration Act which had the effect of allocating to the Commission the arbitral functions and to a Commonwealth Industrial Court the judicial functions formerly carried out by the Commonwealth Court of Conciliation and Arbitration. The Commission consists of a President, not less than two Deputy Presidents, a Senior Commissioner and not less than five Commissioners. The *Commonwealth Industrial Court* comprises a Chief Judge and not more than two other Judges.

The State Court of Arbitration consists of a President, who must be a person qualified to be appointed a Judge of the Supreme Court, a representative of the employers' organizations registered with the Court, and a representative of the employees' unions.

Commonwealth Basic Wage.

The first determination of a wage standard by a Court in Australia was made in 1907, when Mr. Justice Higgins, President of the Commonwealth Court of Conciliation and Arbitration, fixed an amount of £2 2s. per week for Melbourne as reasonable to meet the needs of " a family of about five." This determination is commonly referred to as the " Harvester Judgment " from the fact that it related to an application by the proprietors of the Sunshine Harvester Works that the wage paid to their employees was " fair and reasonable."

The " Harvester " standard was adopted by the Court for incorporation in its awards and the rates remained virtually unchanged until 1913. In that year the Court began to have regard to retail price index numbers the first of which, the " A " series, covering food and groceries and rent of all houses, had recently been published by the Commonwealth Statistician. In general, the practice was to revise basic wage rates in direct proportion to variations in the retail price index. Until 1918 the Court, in computing " Harvester " equivalents, used the index numbers for the previous calendar year and, from 1918 to 1921, the figures for the next preceding four quarters.

Commonwealth Basic Wage—*continued.*

During the period of application of this system, it was frequently contended that it failed to maintain the " Harvester " standard. Criticism became more general with the rise in prices towards the end of the first World War and led to the appointment in 1919 of a Royal Commission on the Basic Wage under the chairmanship of A. B. Piddington, K.C. The " Piddington Commission," as it came to be called, was required by its terms of reference to enquire into the actual cost of maintaining in a reasonable state of comfort a household comprising a man and his wife and three children under fourteen years of age, and also the means to be adopted for the automatic adjustment of the basic wage in order to maintain its purchasing power. The Commission presented its findings in two reports, the first of which was made in November, 1920, and the second in April, 1921. The recommendations in relation to a living wage were rejected by the Court as being so much in excess of existing wages as to cause doubt about the capacity of industry to pay such rates. The Commission's finding in regard to the automatic adjustment of the basic wage led to the creation of the " C " Series Index of Retail Prices, an index much more comprehensive in scope than the original " A " Series, in that it includes the additional groups Clothing and Miscellaneous Expenditure.

In 1921, the Court began to insert provisions in awards for the automatic adjustment of wages according to quarterly movements in the " A " Series index, and a loading of 3s. was added to the " Harvester " equivalent by Mr. Justice Powers to ensure that during a period of rapidly rising prices the worker would suffer no loss of real wages in the interval between the adjustment of rates.

The method of fixation and adjustment remained unaltered until the depression of the 1930's, when the Court, having satisfied itself that unfavourable economic conditions prevented the maintenance of real wages at their existing level, directed that, with certain exceptions, all wages under its jurisdiction should be reduced by ten per cent. as from the 1st February, 1931.

In its judgment of May, 1933, the Court concluded that the method of adjusting wages to conform to variations in the " A " Series index numbers had resulted in a decrease of real wages to a level below the prescribed percentage. To correct this decline, it adopted the use of the " D " Series index, derived by combining the " A " and the " C " Series indexes.

In a judgment delivered in April, 1934, the Court introduced an entirely new basis for the fixation of the basic wage. The " Harvester " standard supplemented by the Powers loading of 3s. was discarded and a fresh starting point selected. The new wage was largely founded upon a declaration of £4 4s. per week made by the New South Wales Board of Trade in August, 1925. As this amount took into consideration the upward tendency of prices, the Court regarded the rate as applicable to the year 1926. The " C " Series index number for Sydney for that year was 1033, and for the December quarter of 1933 stood at 829. Thus the 1933 equivalent in purchasing power of an amount of £4 4s. in 1926 was £3 7s., to the nearest shilling (84s. $\times$ 829 $\div$ 1,033), which became the rate applicable in Sydney from the 1st May, 1934. The equating of this wage to the index number 829 established the relationship ' 1,000 in the " C " Series index = £4 1s. in the wage ' (67s. $\times$ 1,000 $\div$ 829, to the nearest shilling) and by applying the multiplier 0·081 to the " C " Series index number for any town or group of towns at any time, the wage in shillings could be readily computed. Owing to adverse industrial conditions in South Australia and Tasmania, the new rates for Hobart and Adelaide were graduated so as not to come into full operation until the 1st June, 1935. The date on which future periodical adjustments were to become operative was altered to the beginning of the first pay period in the months of June, September, December or March, and adjustments were continued on this basis until 1939. Thereafter they took effect from the beginning of the first pay period commencing in the months of February, May, August or November, until their abolition by the Court in its judgment of the 12th September, 1953.

The hearing of a claim by the combined unions for an increase in the basic wage was concluded in June, 1937. The Court, in fixing a new rate, transferred the basis of the adjustment of wages from the " C " Series to a special " Court " Series based upon the relationship between wages and index numbers which had been established in 1934. This Court Series was, in effect, simply a table expressing in shillings the wage rates derived by the use of the conversion factor 0·081. The Court's judgment further provided for the addition of " prosperity loadings " to the rates so derived, which came to be designated the " needs portion " of the wage. The amount of the loading applied to the " needs " wage for Sydney, Melbourne and Brisbane was 6s., for Adelaide, Perth and Hobart, 4s. and for the Six Capital Cities as a whole, 5s.

Commonwealth Basic Wage—*continued.*

In general, the method of the 1937 judgment was retained by the Court until its " interim " decision of the 13th December, 1946 when, in granting an increase of 7s. per week in the " needs " portion of the wage, it inaugurated a Court Index (Second Series). In fixing the base of this new series, the " C " Series index number (1146) for the Six Capital Cities as a whole in the September quarter, 1946 was equated to the " needs " portion (£5) of the new Six Capitals wage. This established the base, 1000 in the " C " Series index = £4 7s. in the wage. The immediate monetary effect was to increase by 7s. per week the " needs " wage in each of the capital cities with the exception of Hobart, where the increase was 6s. The prosperity loadings were retained at their original levels.

On the application early in 1949 of certain unions seeking, among other things, an increase in the basic wage the Court, after an exhaustive examination of the Australian economy, declared a general increase of £1 per week. Judgment was delivered on the 12th October, 1950, the new rates to be operative from the first pay period in December. The Court also introduced a Court Index (Third Series), derived by equating 1572 (the " C " Series index number for the Six Capital Cities as a whole in the September quarter, 1950) to £8 2s., the increased weighted average wage for the Six Capitals (made up of the " needs " portion £6 17s., plus a uniform prosperity loading of 5s., plus the additional £1 awarded by the Court). In this way, 1000 in the " C " Series index became equal to £5 3s. in the wage. In determining the new rate of payment, a uniform amount of £1 5s. was added to the existing " needs " basic wage, with the concurrent discontinuance of the prosperity loading as a separate entity. This had the effect of increasing the basic wage in Sydney, Melbourne and Brisbane by 19s., in Adelaide, Perth and Hobart by £1 1s., and for the Six Capital Cities as a whole by £1. From, and including, the first pay period in February, 1951, the rates so determined were to be subject in their entirety to quarterly adjustment in accordance with movements in the Court Index (Third Series). Thus the components " needs portion " and " prosperity loading " ceased to exist as separate and distinguishable parts of the wage.

Following applications by employers' organizations requesting, among other things, " that the system of adjusting the basic wages in accordance with variations occurring in retail price index numbers be abandoned " and counter claims by employees' organizations for increases in the basic wage for adult males, the Court on the 16th September, 1952 commenced hearing evidence in what has come to be known as the " Basic Wage and Standard Hours Inquiry, 1952–53." Submission of evidence continued intermittently until the 11th September, 1953, and on the following day the Court announced its decision. The application for discontinuance of the system of adjusting the basic wages in accordance with variations in the retail price index numbers was granted but all of the other applications were refused. On the 27th October, in stating the reasons for its decisions, the Court made it clear that, as in its opinion there should be no departure from " its now well established principle that the basic wage should be the highest that the capacity of the community as a whole can sustain " and as it had " withdrawn from relating the basic wage to the fulfilment of any particular standard of needs," the Court " finds it impossible to justify the continuance of an ' automatic ' adjustment system whose purpose is to maintain the purchasing power of a particular wage (assessed with regard to the capacity of industry to pay such wage in 1950)." In consequence, the wage rates which had applied from the beginning of the first pay period commencing in August, 1953, continued to operate.

In November, 1955, application was made to the Court by certain employees' organizations seeking an alteration of the basic wage. Among matters included in the application were requests that the wage be increased to the amount which it would have reached if automatic quarterly adjustments, discontinued since September, 1953, had continued to apply, that the wage be raised by a further £1, and that automatic quarterly adjustments be restored. After a protracted hearing, in the course of which the Commonwealth Government intervened in the public interest under Section 26 of the Act and each of the State Governments was represented as a respondent, judgment was delivered on the 25th May, 1956. The Court refused the first of the unions' claims and rejected the request for the restoration of the quarterly adjustments, but granted an increase of 10s. per week in the adult male basic wage to apply from the beginning of the first pay period commencing in June, 1956.

State Basic Wage.

Under the provisions of an amendment of 1925 to the Industrial Arbitration Act, 1912, the State Court of Arbitration was required to declare a basic wage annually, to operate from the 1st July in each year.

In 1930, the Court was empowered by another amendment to the Act to adjust the annual declaration each quarter in consonance with "the variation (if any) in the cost of living." A further amendment in 1950 removed this obligation and gives the Court discretion to make basic wage determinations at any time, provided that such reviews are at intervals of not less than twelve months. The provision for quarterly adjustments was retained. Basic wage determinations of the Court are automatically applicable, and thus become the minimum wage permissible by law, in respect to all male and female workers who are covered by industrial awards made by the State Court or by agreements registered with the Court and those who come within the provisions of the Factories and Shops Act.

The first decision of the Court took effect on the first July, 1926, and prescribed a rate of £4 5s. for males and £2 5s. 11d. for females throughout the whole of the State. In fixing the male rate, the Court divided the wage into four elements and allowed such amounts for each as to meet the requirements of a family unit of four, comprising a man, his wife and two children. For Food and Groceries the amount was the equivalent of the Piddington Commission's standard but reduced to provide for a family unit of four ; for Rent, the average rental of four and five roomed houses ; for Clothing, an amount approximating the sum fixed for such expenditure by the New South Wales Board of Trade in 1925, and for Miscellaneous Expenditure, an amount based on the Piddington Commission's findings.

These rates remained unaltered until the 1st July, 1929, when the amounts were increased to £4 7s. and £2 7s. respectively, with the exception of certain specified goldfields areas for which the previous wage was retained.

A revision by the Court following the 1930 inquiry resulted in the declaration of a separate wage for the Metropolitan Area of £4 6s. for males and £2 6s. 5d. for females. In this connection, the Metropolitan Area is the area comprised within a radius of 15 miles from the General Post Office, Perth. Rates for all other parts of the State were fixed at £4 5s. and £2 5s. 11d. respectively.

Additional power was given to the Court under the provisions of the Industrial Arbitration Act Amendment Act, 1930, to enable quarterly adjustments to be made to the rates fixed by the annual declaration and, on the 3rd March, 1931, rates of £3 18s. for males and £2 2s. 2d. for females were prescribed for the Metropolitan Area, and of £3 17s. and £2 1s. 8d. for all other parts of the State. The Court is empowered to make such quarterly adjustments only when a rise of one shilling or more per week is indicated in the "cost of living."

The annual declaration operative from the 1st July, 1931, did not vary these amounts, but a further quarterly adjustment on the 18th August, 1931, marked the inauguration of a separate wage for agricultural areas, which are taken to be those areas, other than the Court's Metropolitan Area, contained within the official South West Land Division as described in the Land Act.

In 1938 an inquiry, which was the most comprehensive since the original declaration, gave special consideration to the factors of national income and standards of nutrition and as a result wage levels throughout the State were considerably increased from the 1st July in that year. The Rent and Miscellaneous Expenditure elements of the wage were based on the existing standards but Clothing was based on the Piddington standard, reduced to provide for a famillt unit of four, and Food and Groceries on the Piddington standard plus an amount of 1s.

Subsequent annual declarations until 1942 maintained in purchasing power the standard of the 1938 judgment.

State Basic Wage—*continued.*

At a sitting of the Court held on the 26th February, 1942, to consider the quarterly adjustment of the basic wage, the Court decided that, under the existing economic conditions, there should be no alteration to the rates then in force. This decision marked the first occasion upon which the Court, in the exercise of the discretionary powers conferred upon it under the Act, had refrained from making a quarterly adjustment to the wage to equate its purchasing power to the standards of the relevant annual declaration. It was followed by a similar decision given on the 29th April, 1942, when the Court reaffirmed that no adjustment should be made to existing rates, despite further increases in retail prices.

On the 11th June, 1942, the Court, in its annual declaration, adopted as its new base the rates which had operated since the 28th July, 1941, and these remained in force until the 8th August, 1942, when they were superseded by a Basic Wage Adjustment Order made by the Premier under the authority of National Security (Economic Organization) Regulations. The rates established under this Order were substantially the current equivalents of the standards adopted by the Court in its annual declarations from 1938 to 1941.

On the 30th October, 1942, these standards were re-adopted by the Court for the purposes of the quarterly adjustments and continued to apply until the Interim Basic Wage Declaration of the 26th February, 1947. In this declaration, made under powers conferred by an amendment in December, 1946, to National Security (Economic Organization) Regulations, the basic wage was increased by a loading of 5s. This loading was varied proportionately to the remainder of the basic wage in subsequent declarations and quarterly adjustments.

An amendment of 1950 to the Industrial Arbitration Act removed the Court's obligation to make annual declarations, empowers it to make basic wage determinations at any time during the year at intervals of not less than twelve months, subject only to quarterly adjustments, and requires that in such determinations the Court must give due consideration to the economic capacity of industry to pay any proposed increase in the basic wage.

Consequent on the judgment of the Commonwealth Court on the 12th October, 1950, the State Court declared a new wage, incorporating an increase of £1 for males and 15s. for females and consolidating the four elements and the loading previously mentioned, to have effect from the 18th December, 1950. This meant that the concept of a composite wage, which had applied since the initial declaration in 1926, was now abandoned. It also decided in January, 1951, that any quarterly adjustments should be based on variations in the "C" Series Retail Prices Index Numbers. On the 28th November, 1951, the Court raised the basic wage for females from 54 per cent. of the male rate to 65 per cent., the new rates to operate from the 1st December, 1951.

On the 13th November, 1953, the Court again exercised its discretionary powers, conferred by Section 127 of the Act, and determined that no change should be made in the basic wage, although there had been an appreciable increase in the "C" Series Retail Prices Index. This decision governed subsequent determinations until the 9th August, 1955, when the Court reverted to the practice of making quarterly adjustments.

DWELLINGS SUMMARY, WESTERN AUSTRALIA—CENSUSES OF 1947 AND 1954.

In Tables Nos. 43, 44, 45, 48, 50, 51, and 52 figures are shown separately for "Metropolitan Urban" "Other Urban," and "Rural."

"Metropolitan Urban" comprises the Metropolitan Statistical Division.

"Other Urban" comprises—

(1) all country municipalities; and

(2) towns outside the Metropolitan Statistical Division not separately incorporated for purposes of local government but whose boundaries were specially determined for Census purposes, and which had a population of 1,000 or more at the Census.

"Rural" comprises all that part of the State not included in "Metropolitan" and "Other Urban."

For the purpose of the Census a "*dwelling*" is any habitation occupied by a household group living together as a domestic unit whether comprising the whole or only part of a building.

No. 43.—Occupied Dwellings, according to Class.

(Exclusive of dwellings occupied solely by full-blood Aborigines.)

(*a*) In previous Censuses dwellings returned on the Schedules as Sheds, Huts, Garages, etc., were included with Private Houses. In the Census of 1954 these dwellings are shown in tabulations as a separate group whenever practicable, but are linked with Private Houses to preserve continuity with past Census results.

(*b*) "Share of Private House" is a portion of a shared Private House which is occupied separately and for which portion a separate Householder's Schedule was furnished.

(*c*) "Flat" is part of a House or other building which can be completely closed off and which includes both cooking and bathing facilities.

(*d*) "Other" Private Dwelling is part of a building which is not a self-contained unit. It may be an apartment, rooms, etc.

(*e*) "Dwellings Other than Private" include Hotels, Boarding Houses, Lodging Houses, Hostels, Hospitals Educational .Religious and Charitable Institutions. Defence and Penal Establishments etc.

RETAIL SALES STATISTICS.

1. *Introduction.*

The figures in the following tables, which relate to the activities of retail establishments in Western Australia, are supplied by the Commonwealth Statistician.

Table No. 54 is an extract from a quarterly statistical statement " Retail Sales of Goods," which contains similar information for each of the other States and for the Commonwealth as a whole. Tables Nos. 55–58 have been extracted from Bulletins Nos. 6 and 13 of the Census of Retail Establishments for the year ended 30th June, 1953.

Throughout the tables, the particulars shown relate to sales of goods (as distinct from services, accommodation, entertainments, meals, etc.) made to the public by establishments selling retail goods from fixed premises such as shops, rooms, kiosks and yards. Data for the years 1948–49 and 1952–53 were obtained from Censuses taken in respect of those years. Particulars for other periods, shown in Table No. 54, are estimates derived from a quarterly sample survey.

In addition to the two Censuses of Retail Establishments already mentioned, information is available from the first such Census, which related to the year ended 30th June, 1948. However, these statistics are not as detailed as those shown in the following tables and comparisons, where they occur, have been confined to the results of the Censuses of 1948–49 and 1952–53.

2. *Scope of Census.*

The Censuses have been designed principally to cover sales to the final consumer of goods generally used for household and personal use. For this reason, sales of farm and industrial machinery and equipment, earth-moving equipment, etc., have been excluded. In the first two Censuses sales of building materials (except timber) were included, but in the 1952–53 Census all building materials have been excluded. All retail sales of motor vehicles, parts, etc., are included whether for industrial, commercial, farm or private use. Business machines such as typewriters are also included when sold from a retail establishment.

Wholesalers and manufacturers are included if they sell *regularly* by retail, but not if they make retail sales only occasionally. Itinerant vendors and casual stalls or booths are excluded as are such organizations as clubs and societies making sales to their own members. Both new and second hand goods are included in sales recorded by relevant retail establishments.

Because of the above-mentioned restrictions to the scope of the Census, the aggregates shown for some commodity groups may be less than the *total* value of goods sold to consumers by all establishments regardless of definition. In particular, this applies to tobacco, and beer, wine and spirits which are also sold by establishments not included in the Census. However, some additional details of sales of these items were obtained from a supplementary collection of licensed clubs, etc.

In addition to ordinary retail shops, as generally understood, the Census *includes* the following :—

Hotels, wine saloons, and refreshment rooms.
Bakers, whether selling from retail premises or from a vehicle.
Produce Merchants.
Tailors.
Garages and service stations, motor vehicle distributors.
Gas and Electricity suppliers, in respect only of their retail sales of appliances.
Fuel and Ice Merchants, with retail premises but not all those selling only from a vehicle.

The following types of activities are *excluded* :—

Opticians and optometrists.
Clubs, guest houses, theatres and cinemas.
Agents (except in respect of goods sold on own behalf).
Dry Cleaners and Laundries.
Direct selling (either on site or from delivery vehicles) from market or flower gardens, nurseries, dairies, poultry farms, chick hatcheries, except where a shop or regular roadside stall is conducted.
Hawkers, street barrows, casual stalls and street sellers.
Timber yards and joinery works.
Brick works.
Roofing tile works.
Trade services such as monumental masonry, carpentry, electrical contracting, plumbing, upholstery, etc.
Real estate agents, stock and station agents.
Newspaper publishers and printers (except in respect of goods sold by retail from a shop).
Photographers and picture framers.
Dressmakers.
Caterers for special occasions (races, sports meetings, etc.).
Chiropodists.
Herbalists.
Lending libraries.

RETAIL SALES STATISTICS—*continued.*

3. *Lists of Establishments and Collection of Returns.*

The work of listing of retail establishments to be included in the 1952–53 Retail Census was carried out by postal officers throughout Australia. The lists were checked against the 1948–49 Retail Census lists and, where necessary, against other available sources of information, such as trade directories, lists of liquor licenses, etc., and minor deficiencies were rectified.

Census forms were distributed and collected by post and, where necessary, for elucidation of facts, additional enquiries were addressed to retailers.

4. *Census and Statistics Act*, 1905–49.

The Census was conducted under the authority of the Census and Statistics Act, 1905–49, under the terms of which all returns supplied by traders must be treated as strictly confidential and disclosure of information shown on individual returns is prohibited. Consequently, in the tables set out in this Bulletin some aggregates which refer to a small number of establishments have either been grouped with others or withheld from publication in order to avoid risk of disclosure of confidential information.

5. *The Census Form.*

On the Census form, clear distinction was drawn between :—

(1) Retail Sales of goods ;

and (2) " Other Takings," including payment for services often associated with retailing. These are hairdressing, repairs, meals, accommodation, laundry and dry cleaning, etc.

The form provided a separate heading for " Wholesale Sales of Goods " in order to avoid their being incorrectly included under any other heading.

Two of the commodity groups shown in the retail section of the form, namely Basic Building Materials and Farm Machinery and Implements were listed separately to ensure that details of these sales were not included under any of the other retail groupings. Sales of these commodities are not included in the aggregates shown in this Bulletin.

Two general qualifications are needed to explain the figures of sales recorded :—

(1) Where actual figures were not available traders were asked to supply careful estimates of total retail sales and of sales by commodity groups.

(2) As it was impossible to define or list in detail the types of goods to be included under each commodity group, traders were asked to show figures for each group in accordance with ordinary trade groupings as understood by them. The commodity group totals are therefore subject to this qualification. In particular, despite numerous queries made when returns were being examined, it is possible that traders did not always show separately sales of Tobacco, Cigars and Cigarettes in the item provided on the form.

6. *Explanation of Terms used in the Tables.*

Commodity Group—the thirty-two broad groups (reduced for tabulation purposes to thirty) into which traders were asked to dissect their total retail sales of goods.

Other Food—includes retail sales of fish, poultry, cooked meat, wrapped lunches, etc., but excludes takings from meals sold in cafes, restaurants, etc., for which a separate dissection was obtained under " Other Takings."

Other Goods—comprises goods which are not covered by the thirty-one specified groups and includes bicycles, flowers, plants, garden supplies, toys, sewing machines, baby carriages, medical and surgical supplies, photographic equipment, etc.

Main Type of Business—is a classification of each establishment according to the predominant type of goods sold or service rendered. The classification was based mainly on the dissection of commodity sales recorded on the Census form but, in some cases, namely, Other Food and Other Goods, the description given by the proprietor was used as a guide. For the purpose of determining the predominant type of goods sold some combinations of commodity items were considered as " main lines," *e.g.*, Clothing and Drapery (Men's and Boys' wear ; Women's, Girls' and Infants' wear ; and Drapery Piecegoods, Manchester, etc.). Accordingly, establishments were classified to type of business on the basis of the predominant " main line " of goods sold or service rendered and where the " main line " consisted of a combination of items, the classification was made to the major item within the " main line."

RETAIL SALES STATISTICS—*continued.*

Stocks of Goods on Hand and Method of Valuation.—Figures shown for stocks of goods on hand at 30th June, 1953, represent the total value of goods held for retail sale by establishments with stocks of more than £500 at that date. Retail stocks of less than £500 held by individual establishments are excluded from the figures. Details of stocks shown are aggregates of the figures supplied on individual returns without any adjustment for different methods of valuation (cost price, market price, replacement cost, etc.).

Metropolitan Area.—As defined for statistical purposes includes the city proper and adjoining urban areas. The names of Local Government Areas included in the metropolitan area of Perth are shown in Table No. 58 and on the map of Western Australia in Part V. of the Statistical Register.

Statistical Retail Areas.—These areas have been designed for Retail Census purposes and are groups of contiguous Local Government Areas within Statistical Divisions. In Western Australia the Metropolitan Statistical Division has been divided into seven Statistical Retail Areas but each of the remaining Statistical Divisions has been regarded as a Statistical Retail Area, with the exception of Central, North-West, Pilbara, and Kimberley Statistical Divisions which, combined, form one Statistical Retail Area. Names of Local Government Areas included in each Statistical Retail Area and Statistical Division are shown in Table No. 58.

7. *Comparison of* 1948–49 *and* 1952–53 *Census results.*

In some tables comparisons are shown of the 1948–49 and 1952–53 Retail Census results. In general, the scope of the 1952–53 Census follows the same general principles adopted for the earlier Census and as a result the same types of establishments are included in both Censuses. However, establishments with total retail sales of less than £500 were excluded in 1952–53, whereas only those with less than £50 in 1948–49 were excluded from the tabulations. In 1952–53 there were an additional 294 establishments in Western Australia with retail sales of less than £500 but more than £100, with total retail sales of £85,000. These establishments, which were excluded from the tabulations, represent approximately 3·7 per cent. of the total number of establishments in Western Australia but the amount of their sales was not significant (less than 0·1 per cent. of the total).

A more detailed dissection of total retail turnover was obtained in 1952–53 (32 groups in 1952–53 and 17 in 1948–49) but comparability of commodity groups has been maintained as the additional dissections relate mainly to further break-downs of the 1948–49 groups. However, sales of building materials (except timber) where sold by retailers are included in the 1948–49 Census figures, whereas all building materials are excluded from the 1952–53 Census. Sales of farm machinery and implements, obtained separately on the 1952–53 Census forms, are excluded from the tabulations. These sales were also excluded as far as possible in the 1948–49 Census.

The method of classification to type of business used in 1952–53 has been explained in Section 6. In 1948–49 the description of business given by the proprietor formed the basis of the classification to type of business, although in cases where the description given did not indicate the nature of goods sold (*e.g.*, general store, variety store, etc.), type of business was determined by the commodity group in which the largest sales were recorded. Differences in coding procedure between the two Censuses would affect only those establishments with sales of approximately equal value in two or more commodity groups. Some such composite establishments may have been coded to one type of business in 1948–49 when classified in accordance with the description ot business given, but to another type of business in 1952–53 when classified in accordance with the " main line " with the largest sales.

No. 54.—Value of Retail Sales Classified According to Commodity Groups

Western Australia : 1948–49 to 1955-56

The figures in the table below relate to goods (as distinct from services, accommodation, entertainments, meals, etc.) sold to the public by establishments selling retail goods from fixed premises (shops, rooms, kiosks, yards). The table contains particulars for the years 1948–49 to 1955–56 on a comparable basis throughout. The figures for the years 1948–49 and 1952–53 were obtained from Censuses taken in respect of those years, whereas particulars for the other periods shown are estimates based on sample surveys.

(*c*) Establishments with total retail sales of £500 or more in 1952–53. In this year there were 294 establishments in Western Australia with retail sales of less than £500 but more than £100, with total retail sales of £85,000. (*d*) Total value of stocks held for retail sale by all establishments with retail stocks of more than £500 at 30th June, 1953. Stocks were not included where values for individual establishments were less than £500. Therefore in some types of business (particularly in the Food, Hotels, Tobacconists, etc., groups) where a large proportion of establishments had stocks of less than £500 at 30th June, 1953, the values shown may be substantially less than the total value of stocks held by all establishments classified to that type of business. (a) The index numbers appearing in these four columns cannot be compared horizontally to show the relative levels of the groups since the prices aggregate in each group in the base period is made equal to 1,000. (b) Not available. (c) The "C" Series index figures combine together in one series the index numbers relating to food and groceries, rent, clothing, household drapery and utensils, fuel and light, and other miscellaneous items of household expenditure. They may be used directly to show the relative levels in different places and at different times.

(*a*) Since December, 1950, the female basic wage has been 75 per cent. of the male rate, previously it had ranged between 54 per cent. and 75 per cent. (*b*) The first State Basic Wage operated from 1st July, 1926. (*c*) On 12th September, 1953, the Commonwealth Court of Arbitration announced that automatic adjustment of basic wages in accordance with variations in retail price index numbers would be discontinued. (*d*) Despite variations in the "C" Series prices index, decisions of the State Court on the 13th November, 1953, and each succeeding quarter until 27th April, 1955, kept the State basic wage unchanged until the 9th August, 1955, when the Court reverted to the practice of making quarterly adjustments. (*e*) The Commonwealth basic wage rates since 12th September, 1953, remained unchanged until 25th May, 1956, when the Court granted an increase of 10s. in the adult male rate.
